

- **CANVAS PRINTS**

- This is a way to display a reproduction of an art piece or a photo taken with a 35mm Digital Camera, or cell phone, or scanned image.
- The canvas material has a little texture to it that gives a very subtle but artist look to any image printed on it.
- We offer Canvas prints, which are prints that are cut to the image size or desired size for framing.
- Wrapped Canvas is another option we have. This is the most common selection. This is created with the canvas stretched around a wood frame. This has the option of an image wrap on the sides or a solid color. We can give out expert opinion if needed. It will come with a closed back with breathable fabric and hanging hardware ready to be mounted on your wall.
- Canvas prints can have a glossy finish or matte finish.
- See our price sheet for a cost.
