

## • FROSTED VINYL

- This material can be used to add a classy finish to a window while simultaneously providing complete privacy when covering the entire window.
- We are able to do full window coverings along with custom shape cut outs to add a design element to the glass or acrylic.
- This material is \$7.50 per sq. ft. Additional charges for weeding and masking.

## • WINDOW PERF

- This is used to place a business name or logo on an exterior window. What makes it different from the light-blocking vinyl is that from the inside of the building the outside view can be seen through the window perf. From the outside there is no ability to see through the window perf during the day hours; When the outside lighting is brighter than the inside.
- This material cost is determined by the size of the project. Quoted upon request.
